

Fuji KIKU Fubrax

Even size, intense colour

This Fuji clone combines excellent quality characteristics: the fruit has an even size, it's striped and vibrant ruby red, even on the shady side.

Origin

Tree mutation from the virus-free Fuji KIKU 8

Licence: KIKU GmbH

Tree

Medium to strong growth, robust branches, medium to late bloom

Harvest

Mid-October

Our Tree - Your Success

The Gruber Genetti Nursery has been the epitome of **supremely high quality** apple tree propagation **since 1991**.

Our production site in Roverchiara, Verona/Italy comprises **more than 200 ha**, providing us with a yearly production of **about 2 million apple trees**. Thanks to our many years' experience, our competent staff and state-of-the-art technology, you will receive **high quality saplings** from current varieties and clones.

In addition to comprehensive advice, our service includes **prompt processing** of your order as well as **punctual delivery**.
