

# Nicoter cov Kanzi

## The vivid red club variety

This trademarked vivid red club variety resulted from a cross between Gala and Braeburn. The apple is slightly conical, medium-sized to large, it has juicy, firm flesh with a balanced sugar-acid ratio and a unique flavour.

### Origin

Grower: Jo Nicolai Nursery and Leuven University/Belgium

**Licence:** EFC (European Fruit Cooperation) Belgium

### Tree

Medium growth, medium early bloom

### Harvest

Middle to end of September

**Comment:** Owing to the central marketing of the club variety, we can only deliver to customers who are members of a producer organisation that has signed a contract with the variety owner (EFC).

## Our Tree - Your Success

The Gruber Genetti Nursery has been the epitome of **supremely high quality** apple tree propagation **since 1991**.

Our production site in Roverchiara, Verona/Italy comprises **more than 200 ha**, providing us with a yearly production of **about 2 million apple trees**.
